

Walk 5 (1 hr)

As above until you get to the stepping stones and then continue straight on through a gate and over a stile into "Pompocali"(a reputed Roman campsite). Climb up for some lovely views then walk along the top dropping back down to the beck, through the old Mill and along an enclosed path. Over the stile the old bridge is in front of you. Scramble up the bank on the left and back onto the railway track turning right to go back and rejoin the route towards Bardsey.

To reach another entrance to Hetchell Woods cross the A58 in your car go up Mill Lane, right along Holme Farm Lane and then continue straight on along Milner Lane and you can park along on the right.

Walk 6 (1 hr)

Parking at the top entrance to Hetchell Woods, cross the road and go on a well defined path across the fields to Stubbing Moor (Wothersome). Continue on this wide track on the edge of the woods and when you get to the junction turn sharp right. Across the field edge to Dog Kennel Lane. Here turn right down the lane all the way to Milner Lane. Turn right along the road back to your car.

All the walks are dog friendly but remember that it is your responsibility to clear up after your dog, and control him if there is livestock about. All the footpaths and many others are to be found on Ordnance Survey Pathfinder 672 Harewood.

Once you have found the Railway track and Hetchell woods you can vary your walk daily.

The timing of the walks is approximate but if you have any problems with them or in training your dogs, I will be happy to try and help.
